OUR RANGE

Breeds selected for Africa

Broilers, layers or hardy breeds: we find the strain that suits your climate and your market.

Broilers

Ross 308 · Cobb 500 · Hubbard

Fast growth and excellent feed conversion. Ready for slaughter at 35 to 42 days.

Laying hens

ISA Brown · Lohmann Brown · Hy-Line

High, consistent production. Brown or white eggs depending on the breed.

Hardy breeds

Sasso · Hubbard JA757

Good heat tolerance. Ideal for semi-free-range farming.

Other poultry

Duck · Guinea fowl · Turkey

Available on request, depending on season and hatchery stock.

Egg specifications

Standard values, confirmed with every order

CRITERION	STANDARD
Egg weight	52 to 70 g depending on the breed
Breeder flock age	28 to 60 weeks
Packaging	Boxes of 360 eggs, plastic trays
Preparation	Candled and disinfected, cracked eggs removed
Traceability	By batch and by flock, with batch sheet

Breeds and availability vary with the season. Final specifications are stated in the written offer.

Four countries of origin, one standard of quality

Belgium · Germany · France · Netherlands

QUALITY & ANIMAL HEALTH

Farms meeting EU standards

Every batch is monitored, tested and documented before it leaves Europe.

≥ 90%	80–85%	52–70 g	100%
Target fertility	Expected hatch rate*	Egg weight	Traceable batches

Official veterinary control

Breeder flocks regularly checked by an approved veterinarian. **Regulation (EU) 2016/429**

Salmonella testing

Control programme for breeder flocks. **Regulation (EC) 2160/2003**

Mycoplasma gallisepticum and synoviae

Flocks tested and certified free.

Vaccination programme

Newcastle, Gumboro, infectious bronchitis, Marek and others depending on the flock. Details on the batch sheet.

Disease-free zones

Farms outside any restriction zone (avian influenza, Newcastle) at the time of shipment.

Hygiene and biosecurity

Egg disinfection, controlled storage, hatcheries and farms to EU standards.

Our role: your eyes in Europe

We select the hatcheries, check the documents for every batch and follow the preparation until the plane takes off. You receive the batch sheet before shipment.

* Indicative rates. Hatchability also depends on transport, reception and incubation conditions on site.

EXPORT & LOGISTICS

From European hatchery to your farm

An end-to-end supply chain with a single point of contact.

1. **Order** — Breed, quantity, date
2. **Veterinary certification** — Official certificate
3. **Insulated packaging** — Reinforced boxes
4. **Air freight** — 48 to 72 h
5. **Arrival** — International airport in your country

Documents provided

- Official veterinary health certificate, as required by the destination country
- Certificate of origin
- Commercial invoice and packing list
- Air waybill (AWB)
- Batch sheet: laying date, flock age, vaccinations

Transport

- Air freight Europe → major African airports in about 48 to 72 h, depending on destination
- Temperature kept between 15 and 18 °C
- Shock-resistant reinforced boxes, insulated packaging
- Labelled “Hatching eggs – Fragile – This side up” in line with IATA requirements
- Shipment tracking shared with the customer

We handle the formalities for you

We coordinate the hatchery, certificates, transport and tracking. You tell us what you need; we take care of the rest until arrival at the airport.

Your side on arrival: the import permit issued by your country’s veterinary services, customs clearance and fast transport to the hatchery. We tell you which documents to prepare before you order.
